

JEFFREY KIRK JR

Norwood, MA · 774.219.4927 · jeffkirkjr@gmail.com · linkedin.com/in/jeffkirkjr

SUMMARY

Operations leader and AI systems builder with 11 years at elite financial services firms (Man Group, State Street) and an intensive year of independent R&D producing three production-grade AI and signal intelligence systems. Brings institutional rigor — control frameworks, anomaly detection, data integrity at scale — directly to the architecture, validation, and operation of AI systems. Rare combination: deep domain credibility and the ability to actually build.

INDEPENDENT R&D — AI SYSTEMS & SIGNAL INTELLIGENCE

Self-Directed Research & Development

Jan 2025 – Present

Norwood, MA

Multi-Agent Orchestration · OpenClaw

- Designed and built a fully self-hosted multi-agent system running 6 specialized Claude agents across two physical nodes, using a filesystem-based state machine with atomic job dispatch, heartbeat/retry logic, and deliberate separation of concerns
- Architected human-in-the-loop approval gates before all consequential actions — oversight baked into the architecture, not bolted on afterward

Quantitative Signal Research · Trading Intelligence Platform

- Built a full quantitative research platform: 9 signal scanners, 2,765-symbol universe, automated daily pipelines, regime detection (BULL / BEAR / NEUTRAL / CRASH), and a composite scoring layer
- Ran walk-forward validation across all scanners; identified the top 3 performers (75–81% win rate on 5-day forward returns) and cut 6 underperformers producing negative expected value before deploying any capital
- Delivered a 16-tab single-page dashboard with real-time JSON feeds and regime-gated signal views — designed to surface signal, not noise

Spatial Intelligence · Real Estate Signal Pipeline

- Built a multi-phase signal detection pipeline: public records collection → deed extraction → geographic clustering → confidence-scored signals across 3 Massachusetts cities
- Implemented a Telegram-based human approval gate: pipeline pauses at classification review, waits for operator /approve, then commits — deliberate oversight enforced at every consequential step

PROFESSIONAL EXPERIENCE

Investment Operations Manager

Jan 2022 – Dec 2024

Man Group · Boston, MA

- Built and operated a control framework governing data integrity and regulatory accuracy across post-trade operations for a quantitative portfolio of up to \$45B AUM across 65+ global markets
- Led a team of 10; designed SharePoint-based workflow automations targeting 80% reduction in manual error and 20% improvement in team efficiency
- Built Power BI dashboards surfacing anomalies, workflow gaps, and operational risk signals for senior leadership in real time
- Led UAT and QA for a Charles River OMS implementation — data migration integrity and control framework validation across multiple platforms; zero regulatory findings across semi-annual audits

Senior Investment Operations Analyst

Apr 2021 – Jan 2022

Man Group · Boston, MA

- Overhauled institutional client onboarding for 50+ clients (~\$18B AUM), cutting cycle time by 20% through workflow redesign and cross-functional coordination
- Deployed diagnostic reporting tools that surfaced onboarding bottlenecks in real time and drove leadership resolution of critical operational gaps

Corporate Actions Specialist

Mar 2019 – Apr 2021

Man Group · Boston, MA

- Managed 3,500+ complex corporate action events annually; served as final review point for high-variability scenarios requiring pattern recognition and auditable decision-making under ambiguity
- Led SWIFT automation UAT as Operations SME; engineered SQL-based analytics dashboards for real-time data integrity and payment processing monitoring

Client Operations Manager, Officer

Jan 2018 – Mar 2019

State Street Corporation · Boston, MA

- Led team resolving 50+ complex institutional inquiries weekly; built automated monitoring achieving 99.9% data accuracy for NASDAQ mutual fund pricing
- Established KPIs and standardized end-to-end procedures that reduced escalations and created an auditable, consistent service model

Senior Corporate Actions Specialist / Expat Lead

Jan 2016 – Jan 2018

State Street Corporation · Boston, MA / Hyderabad, India

- Selected for 90-day Hyderabad assignment to stand up a new operational hub; trained 20+ local staff and migrated 80% of domestic workflows while maintaining quality and operational continuity
- Implemented KPI dashboards and standardized monitoring tools to govern the new center from day one

Corporate Actions Specialist

Jun 2013 – Jan 2016

State Street Corporation · Boston, MA

- Built foundational expertise across the full trade and fund operations lifecycle in a regulated financial services environment; executed operational reviews and compliance checks supporting reporting integrity and timely execution

EDUCATION

Master of Business Administration

Graduated with Honors · GPA 3.6 · 2024

Boston University Questrom School of Business

Bachelor of Science in Management

Graduated Cum Laude · GPA 3.48 · 2014

Bridgewater State University · Minor: Accounting & Finance

TECHNICAL SKILLS

AI & Systems: Multi-Agent Architecture · Human-in-the-Loop Design · Prompt Engineering & Validation · Walk-Forward Testing · Empirical Model Evaluation · Python · Linux

Data & BI: SQL · Power BI · Tableau · Advanced Excel · Dashboard Development · Anomaly Detection · Statistical Analysis

Operations: Control Frameworks · Root Cause Analysis · UAT / QA · KPI Development · Risk & Compliance · Process Automation · SharePoint

CERTIFICATIONS Google / Coursera · 2026

Google AI Professional Certificate · Generative AI Leader Professional Certificate · Google AI Essentials · Introduction to Generative AI Learning Path
