PROFESSIONAL SUMMARY

Financial Operations leader with 11+ years of progressive experience spanning custodian-side and buy-side operations, advancing from corporate actions specialist to investment operations manager overseeing \$45B AUM portfolios, trade lifecycle management, client onboarding, and a team with 100% retention. Independently extended that foundation into AI development, building and deploying production systems from scratch including a multi-agent orchestration framework, a quantitative signal platform covering 2,700+ symbols, and a real estate data pipeline. Recognizing a misalignment in a self-built fine-tuning pipeline and shutting it down before deployment, the same structured, risk-aware judgment applied daily in institutional operations. Combines deep financial domain expertise with hands-on AI system design, workflow automation, and quality assurance.

TECHNICAL SKILLS

AI Architecture & Evaluation: Prompt Testing | Model Output Review | Fine-Tuning (Ollama) | Human-in-the-Loop Workflow Design | RAG Architecture | Multi-Agent Systems | Anomaly Detection | AI QA & Testing

Analytics & Business Intelligence: Power BI | Tableau | SQL | Advanced Excel | KPI Reporting | Dashboard Development | Error Analysis | Root Cause Analysis

Financial Operations & Risk: Trade Lifecycle Management | Corporate Actions | Client Onboarding | Risk & Control Frameworks | Exception Handling | Regulatory/Audit Support | Aladdin | Bloomberg | DTCC | Glass Lewis | SWIFT | Charles River OMS

Infrastructure & Dev Tools: Flask | SQLite | VPS Hosting | Tailscale | Debian/Linux | GitHub | Telegram API | SharePoint Automation | ServiceNow | Atlassian Confluence | Windows & Linux OS

EDUCATION

Master of Business Administration | Boston University Questrom School of Business |
Graduated with Honors, GPA: 3.6 | Aug 2024

Bachelor of Science, Management | Bridgewater State University | Operations & Supply Chain |
Minor: Accounting & Finance | Cum Laude, GPA: 3.48 | May 2014

CERTIFICATIONS

- Google AI Professional Certificate — Google/Coursera, 2026
- Google Generative AI Leader Professional Certificate — Google/Coursera, 2026
- Google AI Essentials Specialization — Google/Coursera, 2026
- Google Introduction to Generative AI Learning Path Specialization — Google/Coursera, 2026
- IBM Generative AI for Executives and Business Leaders Specialization — IBM/Coursera, 2026

INDEPENDENT AI & SYSTEMS WORK

Independent Developer & Principal | KJK Projects & Property Management Dec 2024 – Present

- Designed and deployed a self-hosted multi-agent orchestration system running 6 Claude-backed agents with filesystem-based state management, heartbeat/retry logic, and human-in-the-loop approval gates — built independently, without formal coursework or employer direction.
- Built a quantitative trading research platform covering 2,765 symbols across 575 trading days, featuring 9 automated signal scanners, walk-forward validation, regime detection, and Telegram-based report delivery. Approximately 4–6 weeks from live capital deployment before being temporarily tabled.
- Independently built what later proved to be a RAG (Retrieval-Augmented Generation) architecture — the '_sks' shared knowledge system — before completing formal AI coursework and recognizing the architectural pattern.
- Initiated a fine-tuning pipeline using Ollama; observed output misalignment during testing and shut the project down before deployment rather than continue with a system behaving outside expected parameters.
- Built a real estate signal pipeline processing 1,407 properties using MassGIS and HUD spatial data, with a Telegram-based human approval gate for flagged acquisition targets.

PROFESSIONAL EXPERIENCE

Investment Operations Manager Jan 2022 – Dec 2024

Man Group | Boston, MA.

- Directed daily operations and regulatory compliance for a \$45B AUM quantitative portfolio across 65+ global markets, leading a cross-functional team of 10 professionals covering Trade Lifecycle Management, Corporate Actions, and Client Onboarding.
- Architected a department-wide digital transformation utilizing SharePoint Automation to redesign workflows, reducing manual errors by 80% and increasing team productivity by 20% through structured Process Improvement.
- Developed real-time analytical dashboards via Power BI to surface Anomaly Detection, workflow gaps, and operational risk signals, providing senior leadership with actionable, data-driven insights.
- Engineered comprehensive Risk & Control Frameworks (leveraging a Risk & Control Mindset) to manage Exception Handling, ensuring 100% regulatory compliance and seamless Regulatory/Audit Support.
- Mentored staff through structured professional development, achieving 100% team retention, a 35% improvement in performance metrics, and 3 internal promotions within two years.

Senior Investment Operations Analyst Apr 2021 – Jan 2022

Man Group | Boston, MA

- Streamlined the client onboarding process for 50+ institutional clients representing ~\$18B AUM, identifying recurring bottlenecks and redesigning handoffs to improve cycle time and consistency.
- Led rigorous User Acceptance Testing (UAT) and QA validation during a major Charles River Order Management System (OMS) implementation, focusing on data migration integrity.
- Designed and deployed diagnostic reporting tools using SQL to surface onboarding bottlenecks in real-time, providing leadership with immediate visibility to resolve critical operational issues.

Corporate Actions Specialist Mar 2019 – Apr 2021

Man Group | Boston, MA

- Managed the processing of 3,500+ complex corporate action events annually, serving as the final review point for high-variability scenarios and ensuring accurate, auditable decision-making under ambiguity.
- Spearheaded the SWIFT automation project in partnership with S&P Global, rigorously ensuring system integrity via QA checks before deployment, which reduced manual errors and boosted efficiency by 90%.
- Programmed and maintained SQL-based analytics and quality dashboards to enforce strict operational monitoring and real-time data integrity checks.

Client Operations Manager, Officer Jan 2018 – Mar 2019

State Street Corporation | Boston, MA

- Directed a client-facing operations team resolving 50+ weekly institutional inquiries, setting a high standard for responsiveness to manage external risk and ensure client retention.
- Architected a high-reliability automated monitoring and reconciliation system, applying a Quality Evaluation approach that achieved 99.9% data accuracy for NASDAQ-related mutual fund pricing, drastically mitigating risk exposure.

Senior Corporate Actions Specialist / Expat Lead Jan 2016 – Jan 2018

State Street Corporation | Boston, MA / Hyderabad, India

- Orchestrated a strategic 90-day international assignment in Hyderabad, India, serving as the Operations Lead to launch a new operational hub and train 20+ local staff.
- Executed a structured knowledge transfer framework to successfully migrate 80% of domestic workflows to the new center, implementing KPI Reporting dashboards to govern reporting accuracy and efficiency.

Associate II / Intern Jun 2013 – Jan 2016

State Street Corporation | Boston, MA

- Executed high-volume corporate actions processing in a regulated financial services environment, gaining foundational expertise in the full trade and fund operations lifecycle.
